Summary

Cybersecurity graduate with hands-on experience in incident response, log analysis, and enterprise production support across telecom and SaaS environments. Experienced in troubleshooting security-relevant issues using Linux, cloud infrastructure (AWS), monitoring tools, and access control systems. Actively working in an enterprise environment supporting Etisalat and Smiles, with exposure to real-world incidents, SLAs, and high-scale systems. Seeking an entry-level SOC Analyst / Cybersecurity Analyst role focused on detection, investigation, and response.

Experience

Appice (Etisalat and Smiles)
Technical Support Engineer

August 2024 - Present
Dubai, UAE

- Investigated production incidents using application logs, Nginx logs, and database queries
- Performed root-cause analysis on failed API requests, push delivery issues, and abnormal user behavior
- Worked with access controls, device identifiers, and token-based authentication data
- Supported enterprise-scale systems with strict SLAs in a telecom environment
- Collaborated with infra and backend teams during incident triage and recovery

Acquia Inc.
Technical Support Engineer

January 2023 - August 2024
India

- Participated in incident response for P1/P2 production outages under SLA pressure
- Analyzed logs and metrics to identify anomalous behavior and service degradation
- Supported access management via Active Directory in mixed OS environments
- Contributed to post-incident documentation and preventive automation

Simplify Healthcare Inc.
Software Engineer

May 2021 - January 2023
India

- Supported applications in a HIPAA-compliant environment with security and compliance requirements
- Assisted with secure deployment practices and access controls
- Participated in production issue triage with an emphasis on system stability and data protection

Skills

Security & Incident Response Incident triage, root cause analysis, SLA-based escalation **Log analysis** (application, Nginx, system logs) **Access control & RBAC** (Active Directory) **Cloud & Systems** AWS: EC2, S3 (basic security exposure) **Linux:** Ubuntu, CentOS **Networking fundamentals:** TCP/IP, DNS, VPN **Monitoring & Tooling** New Relic, Sumo Logic Prometheus (learning) **Scripting & Automation** Python (security & ops scripts) Bash Terraform (basic)

Education

Middlesex University, Dubai
MS in Cybersecurity and Penetration Testing

Focus Areas:
Network Security, Threat Analysis, Penetration Testing Fundamentals, Ethical Hacking

Hands-on Labs & Tools:
Burp Suite, Nmap, Metasploit, Wireshark

Practical Exposure:
Vulnerability identification, traffic analysis, basic exploitation workflows, security assessment reporting

BMCC, Pune
Bachelors in Computer Application (BBA-CA)
7.1 CGPA
